

### PROGRESS TO DATE

- The SISB Task Force (TF) completed a series of workshops to frame expectations and outcomes for the initiative, and to develop a Strategic Guidance document defining the principles, intent, and considerations for the SISB initiative.
- The project consultant has initiated an environmental scan of SISB models to help inform key features of an SISB model for the Region, such as project identification and selection criteria, revenue models, and investment-sharing frameworks.
- At the May Working Group meeting, the WG reviewed existing SISB models, including the Airport Accord. The WG provided further feedback on applicable model features and selection criteria through an online survey.
- The consultant developed two conceptual SISB models that highlighted the WG’s findings on model features and presented them to the TF for review and further feedback.
- The consultant has completed interviews with all thirteen members of the TF to inform features and critical success factors of an SISB model. Feedback highlighted the importance of a regional SISB model:

- ensuring transparent and accountable governance and administration of the SISB framework
- recognizing the distinctions and diversity between municipalities
- defining regional benefit and the importance of regional significance to identify and prioritize potential SISB initiatives
- aligning projects in scope of the SISB model to regional economic development priorities
- having flexibility to enable sub-regional projects and off-ramps

### UPCOMING ACTIVITIES

- Work continues to finalize an environmental scan, which will help to inform the technical features as well as administration and governance of the model. An interim environmental scan will be shared at the August WG meeting.
- Based on TF and WG feedback, the consultant will continue to refine two of the key deliverables of the SISB initiative: a conceptual model that quantifies the required investments and resulting benefits of SISB initiatives, and an initiative selection framework to enable the identification and prioritization of SISB initiatives.

## SHARED INVESTMENT FOR SHARED BENEFIT

### WHAT IS SHARED INVESTMENT FOR SHARED BENEFIT?

Shared Investment for Shared Benefit (SISB) models are decision-making tools to identify initiatives that require a shared approach among partners, and quantify the required investment and benefits for those partners.

SISB can mean much more than putting dollars into infrastructure; for example, sharing data or expertise collectively for regional benefits.

### WHY ARE WE CREATING AN SISB FOR THE REGION?

As a Region, we know we're stronger when we work together. The Edmonton Metropolitan Region Growth Plan identified a need to prioritize and collaborate on regional investments to support shared growth.

The creation of an SISB model recognizes that as one Region we're greater than the sum of our parts, and that our common challenges can be solved by shared investments and solutions.

### WHAT WILL SISB DO FOR THE REGION?

Developing an SISB model will create a truly regional framework reflecting the unique capabilities and shared strengths of regional municipalities. SISB will help the Region identify opportunities and share limited resources for programs, services or infrastructure that will benefit the whole Region, that would otherwise be beyond the reach of one municipality alone.

SISB will offer a transformational approach to regional cooperation with potential to create measurable cost savings, process efficiencies, leverage economies of scale, and provide value to regional citizens.

### SISB TASK FORCE MEMBERS

Mayor Rod Frank <b>C</b>	Strathcona County
Mayor Cathy Heron <b>VC</b>	City of St. Albert
Mayor John Stewart	City of Beaumont
Mayor Ray Ralph	Town of Devon
Mayor Don Iveson	City of Edmonton
Mayor Gale Katchur	City of Fort Saskatchewan
Mayor Bob Young	City of Leduc
Mayor Tanni Doblanko	Leduc County
Mayor Barry Turner	Town of Morinville
Mayor Rod Shaigec	Parkland County
Mayor Stuart Houston	City of Spruce Grove
Mayor William Choy	Town of Stony Plain
Mayor Alanna Hnatiw	Sturgeon County

### OUR REGIONAL CONTEXT

**SECOND FASTEST GROWING REGION IN CANADA**

### STRATEGIC INTENT OF THE SISB INITIATIVE

"To invest in and leverage the collective strengths, capacity, and resources of the Region's municipalities, and other stakeholders, to eliminate inefficiency, ensure timeliness of action, and deliver infrastructure, programs and services that would otherwise be beyond a municipality's ability to accomplish individually.

SISB will create long-term shared benefit that will enhance the Region's overall quality of life and create the conditions that will contribute to its global competitiveness, attractiveness, and sustainability as we grow."
