

### PROGRESS UPDATE

- The Task Force completed a series of preliminary workshops to frame expectations and outcomes for the initiative, and endorsed a Strategic Guidance document providing principles and direction for the initiative.
- The consultant completed interviews with all 13 member municipalities to inform features and critical success factors of a potential SISB model for the region.
- The Task Force received an overview of a draft **initiative selection framework** and provided direction on important criteria to support decision-making within the SISB model. Based on feedback, the consultant will continue to refine the initiative selection framework and provide a draft process for identifying and prioritizing eligible and regionally significant initiatives.
- The Task Force has reviewed a conceptual SISB model for the Region that was developed based on feedback from Task Force members, the SISB Working Group, and research of existing models relevant to the Region completed by the consultants. The conceptual model incorporates features and considerations identified by the WG and TF, including: recognition of land and services as contributions, revenue allocation, and regional benefits analysis.
- The Task Force approved an acceleration of the SISB project timeline, with a target completion date of December 2020. The schedule change will not impact the scope, quality or cost of the project activities, engagement opportunities and deliverables.

## SHARED INVESTMENT FOR SHARED BENEFIT

### WHAT IS SHARED INVESTMENT FOR SHARED BENEFIT?

Shared Investment for Shared Benefit (SISB) models are decision-making tools to identify initiatives that require a shared approach among partners, and quantify the required investment and benefits for those partners.

SISB can mean much more than putting dollars into infrastructure; for example, sharing data or expertise collectively for regional benefits.

### WHY ARE WE CREATING AN SISB FOR THE REGION?

As a Region, we know we're stronger when we work together. The Edmonton Metropolitan Region Growth Plan identified a need to prioritize and collaborate on regional investments to support shared growth.

The creation of an SISB model recognizes that as one Region we're greater than the sum of our parts, and that our common challenges can be solved by shared investments and solutions.

### WHAT WILL SISB DO FOR THE REGION?

Developing an SISB model will create a truly regional framework reflecting the unique capabilities and shared strengths of regional municipalities. SISB will help the Region identify opportunities and share limited resources for programs, services or infrastructure that will benefit the whole Region, that would otherwise be beyond the reach of one municipality alone.

SISB will offer a transformational approach to regional cooperation with potential to create measurable cost savings, process efficiencies, leverage economies of scale, and provide value to regional citizens.

### OUR REGIONAL CONTEXT

**SECOND FASTEST GROWING REGION IN CANADA**

### STRATEGIC INTENT OF THE SISB INITIATIVE

"To invest in and leverage the collective strengths, capacity, and resources of the Region's municipalities, and other stakeholders, to eliminate inefficiency, ensure timeliness of action, and deliver infrastructure, programs and services that would otherwise be beyond a municipality's ability to accomplish individually.

SISB will create long-term shared benefit that will enhance the Region's overall quality of life and create the conditions that will contribute to its global competitiveness, attractiveness, and sustainability as we grow."
